Subject: Declaration of Conformity to Toxic Substance Control Act

On January 6, 2021, the U.S. Environmental Protection Agency (EPA) published five final rules prohibiting the processing or distribution into commerce of Phenol, Isopropylated Phosphate (3:1) (PIP 3:1) under Section 6(h) of the Toxic Substances Control Act (TSCA) as a persistent, bioaccumulative and toxic (PBT) chemical along with four other PBT chemicals. PIP (3:1) is a chemical substance used as a plasticizer, a flame retardant, an anti-wear additive, or an anti-compressibility additive in hydraulic fluid, lubricating oils, lubricants and greases, various industrial coating, adhesives, sealants, and plastic articles.

The five subject PBT chemicals are identified as follows:

- Phenol, Isopropylated Phosphate (3:1) (PIP 3:1)
- Decabromodiphenyl Ether (DecaBDE)
- 2,4,6-tris(tert-butyl)phenol (2,4,6-TTBP)
- Hexachlorobutadiene (HCBD)
- Pentachlorothiophenol (PCTP)

UE Precision Sensors (PSI) has determined that none of the five restricted PBT substances are present in any of its products. PSI relies upon information from its suppliers, including Safety Data Sheets, in the preparation of this declaration. Based on this information, PSI represents that to the best of its knowledge that it is in compliance with the U.S. Toxic Substances Control Act (TSCA) 2021 restrictions of Persistent, Bioaccumulative and Toxic Substances (PBT) act.
